

Exercise: First and Last Name

Start a new console application project for this exercise.

In this exercise, we want you to query the user for their first and last name then print it in the format LASTNAME, FIRSTNAME.

The program execution should look like the following:

```
Enter First Name: Joe
```

```
Enter Last Name: Schmoe
```

```
You have entered the name Schmoe, Joe.
```

Don't forget the comma and period in the output. Try to make it look exactly as shown here.
